## IAC 2016 Associated Events

Dear IAF Community,

This year there will be several interesting events held in conjunction with the **67th International Astronautical Congress (IAC)** in Guadalajara. These include the **UN/IAF Workshop**, the **IAC Hosts Summit**, the **Space Generation Congress (SGC)**, the **IPMC Workshop**, the **Cross-Cultural Workshop** and the **International Student Workshop**.

The **UN/IAF Workshop**, jointly organized between **UNOOSA** and **IAF**, will be held between the 23-25 September. The workshop focuses on Space Technology for Socio-Economic Benefits and this year's theme is "**Integrated Space Technologies and Applications for a Better Society**"

The **IAC Hosts Summit** will take place on the 25 September and it will bring together past, current and future IAC host organisations. It will be the perfect platform to exchange views and concrete advices on the bidding process and on the secrets to the organisation of a successful IAC.

The **Space Generation Congress (SGC)**, the annual meeting of the **Space Generation Advisory Council** will take place on 22-24 September. Participants are top university students and young professionals with a passion for space who are selected from among applicants of the Space Generation international network.

Three different workshops dedicated to students and/or young professionals will also take place in conjunction with this year's IAC. The **IPMC Workshop** (25 Sep) organised by the International Project management Committee is dedicated to young professionals in the international space community. The **Cross-Cultural Workshop** (25 Sep) provides Emerging Space Leader grantees and IAC Next Generation plenary speakers an opportunity to improve their presentation skills. The **International Student Workshop** (1<sup>st</sup> Oct), organised by the Space University Administrative Committee (SUAC) together with Space Education and Outreach Committee (SEOC), gives students an opportunity to present their work in front of a jury.
