

GLOBAL SPACE EXPLORATION CONFERENCE – GLEX 2017

Save the Date: 6 – 8 June 2017

The International Astronautical Federation (IAF) is pleased to invite you to the **Global Space Exploration Conference (GLEX) 2017** to take place in the Beijing International Convention Center in **Beijing, China** from **6 - 8 June 2017**.

The Conference, co-organised by the **International Astronautical Federation (IAF)** and the **Chinese Society of Astronautics (CSA)**, will bring together leaders and decision-makers within the science and human exploration community – engineers, scientists, entrepreneurs, educators, agency representatives and policy makers. The leaders in the field will converge in Beijing to discuss recent results, current challenges and innovative solutions and it will contain several opportunities to learn about how space exploration investments provide benefits as well as discuss how those benefits can be increased through thoughtful planning and cooperation.

The Chinese Society of Astronautics (CSA) is a close member of the Federation since 1980, the host organisation of two outstanding International Astronautical Congresses (IAC 1996 and IAC 2013), the host organization of the successful 2010 Global Lunar Conference (GLUC) and an IAF Alliance Partner. CSA and IAF are both committed to supporting the international relationships that enable exploration of outer space and are very enthusiastic to organise GLEX 2017.

The conference will feature an Opening Event, 6 Plenary Sessions (PE), Technical Sessions, a Global Networking Forum, and Keynote Lectures.
