The Actors Behind the IAC

The IAC is a joint effort between the International Astronautical Federation (IAF) and a local organizer. The International Astronautical Federation (IAF), along with its partners the International Academy of Astronautics (IAA), the International Institute of Space Law (IISL), and the Space Generation Advisory Council (SGAC), coordinates the overall programme and content of each IAC, and ensures the level of excellency that reflects the more than 65-year history of the event. The local organizing committee or “host” coordinates the logistical elements of the Congress, ensuring that local space actors and content are an integral part of the event.

American Institute of Aeronautics and Astronautics (AIAA)

The American Institute of Aeronautics and Astronautics (AIAA) is nearly 30,000 engineers and scientists, and 95 corporate members, who are dedicated to advancing the global aerospace profession. As the world’s largest professional organization in aerospace, AIAA convenes forums; publishes books, technical journals, and aerospace America; hosts a collection of 160 technical papers; develops and maintains standards; honors and celebrates achievement; and advocates on policy issues. AIAA serves aerospace professionals around the world—who are shaping the future of aerospace—by providing the tools, insights, and collaborative exchanges to advance the state of the art in engineering and science for aerospace, space, and defense.

For more information on AIAA, visit www.aiaa.org, or follow us on Twitter @aiaa

International Astronautical Federation (IAF)

Founded in 1951, the International Astronautical Federation is the world’s leading space advocacy organization with over 160 members from 68 countries including all major space agencies, companies, research institutions, universities, space museums, societies and associations worldwide.

Dedicated to “a space-faring world cooperating for the benefit of humanity,” the Federation advances and promotes space cooperation, knowledge and achievements.

T R O N, alongside its partners the necessary to make the event a resounding success! IAC 2019 will bring together the dynamic mix of people communities, IAC 2019 will bring together the dynamic mix of people. The United States federal government, the location guarantees that key policy and decision makers will hear the message that space exploration, international collaboration, and technology development are critical to human progress. From monuments and memorials to vibrant neighborhoods with influenced and visited, it is a rare opportunity for newcomers and experienced attendees to experience the city. Attendees will enjoy all the benefits of a world-class destination: excellent dining, iconic sights, unrivaled entertainment, and cultural attractions.

Washington, D.C., is a truly international city. The hundreds of embassies, consulates, and international organizations in the city will help attract delegates and attendees from around the world, while its position as the global capital offers a perfect backdrop for a successful event.

Washington, D.C.
What is the IAC?

The IAC is the one place and time of the year where all global space actors come together. The event attracts more than 4,000 participants each year.

Covering all space sectors and topics, it offers everyone the latest space information and developments in academia and industry, networking opportunities, contacts and potential partnerships.

Each year, the IAC changes country, country and local organizer, enabling all to learn more about, and be a part of the world space scene.

What is the IAC 2019 about?

The theme of the 70th IAC is “Space: The Power of the Past, the Present, and the Promise of the Future”. Hosted 21–25 October 2019 in Washington, D.C., by the American Institute of Aeronautics and Astronautics, the event marks the 50th anniversary of humans walking on the moon. The theme reflects the importance of that milestone for the event.
