

Welcome Message from LEI Fanpei

The Global Space Exploration Conference (GLEX2017) will be held 5-9 June 2017 in Beijing, China. We warmly welcome delegates from all over the world to Beijing to attend the Conference. In 2010, the International Astronautical Federation held successfully its global series of conferences for the first time in Beijing. We are very pleased to hold the important and influential conference for the second time in Beijing.

GLEX 2017 will consist of a variety of themed events covering rich and wide technical topics. GLEX 2017 will review the accomplishments of space exploration achieved in the past few years on a global scale and envision the prospects of future development. GLEX 2017 is aimed to push forward the international space cooperation and promote the space technology to better serve people's life.

Beijing is China's technological center in which the major space R&D and production units are located; Beijing is China's cultural center where historical relics are kept. GLEX 2017 will organize technical visits and social tours to let the world delegates have the opportunity to visit China's space facilities and enjoy the elegance of the ancient city.

Space exploration is an unremitting pursuit that concerns the well-being of all people. China's space industry has prospered in recent years. We look forward to meeting with you in Beijing to share technical results to make greater contributions to the human civilization and social progress for the benefits of all mankind.

LEI Fanpei

Co-chair of GLEX 2017

Chairman of China Aerospace Science and Technology Corporation

President of Chinese Society of Astronautics
