

# ESA GOVSATCOM Precursor Outline Proposals

Summary Reporting to ESA/EDA Bilateral

23 May 2016

# ESA GOVSATCOM Precursor Outline Proposals Summary Reporting to ESA/EDA 1/2

- Continued High level of industrial participation triggered by industry ambition in governmental market
- All Notification-of-Intent contributions resulted in Outline Proposals
- 8 consortia with 10 proposals (plus few optional proposals) lead by
  - 8 operators/ service providers and 2 primes
- 5 Lead industry MS (ES;FR;IT;LU;UK) plus several (potential) partner industry MS (e.g. AT; BE; CA; DE; ES; FI; IR; SE; NL; NO; PT...)

# ESA GOVSATCOM Precursor Outline Proposals Summary Reporting to ESA/EDA 2/2

- Availability of significant industry co-investment (co-funding of innovative parts and 100% of recurrent cost)
- 50% co-funding requested from ESA for innovative part
- 8 proposals focused on use of existing missions (pooling & sharing) at an average price to ESA of about 20MEURO
- Two proposals focused on new space assets at an average price to ESA of about 40MEURO
- Currently targeted overall ESA co-funding envelop 60-100MEURO
- Consolidation of number and scope of proposals on-going (e.g. priorities for existing missions; priority for new technologies) to adjust to available budget → In coordination with ESA/EDA TF
- Target 28 June ESA MS Workshop (incl. EDA participation)

# ARTES Applications Programmes

Draft

Input

ESA-EDA BILATERAL, 23 MAY 2016,

09:30-11:30

EDA, BRUSSELS

Doc.: ESA-TIAA-HO-2016-0xxx

Issue: 1.2

Date: 13 May 2016

European Space Agency

## 1. Review of Policy Developments

- a. EDA and ESA Contributions to the EC's Space Strategy for Europe
- b. Coordination of Policy Messages for the 30 May 2016 Informal Space Council
- c. Update on ESA Ministerial Council Preparations

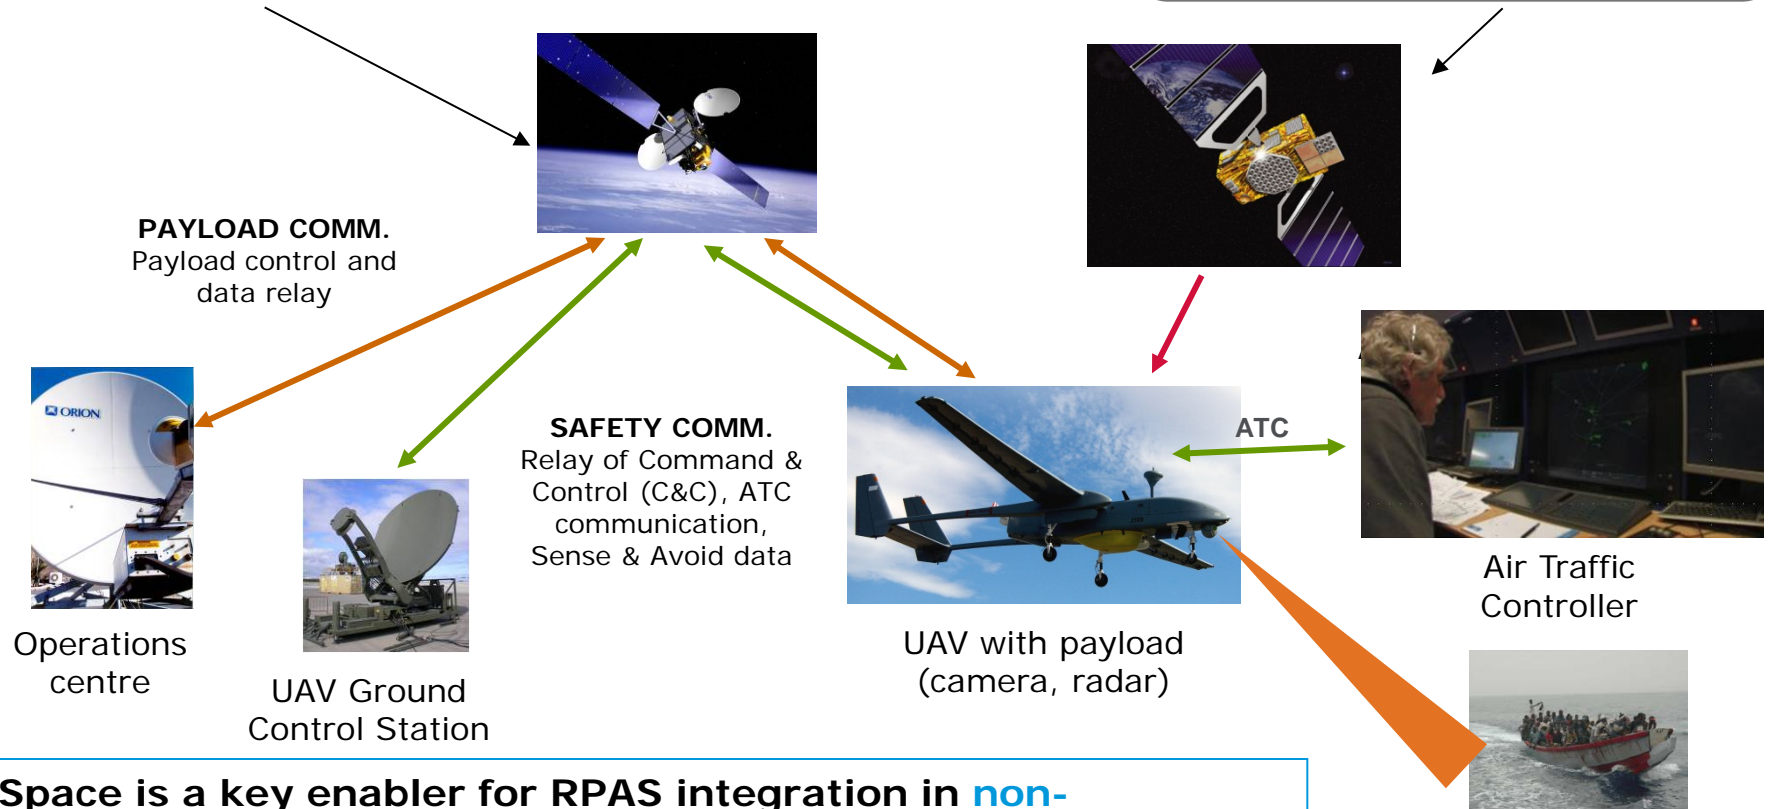

## 2. Opportunities for Cooperation

- a. GOVSATCOM: State of Play
- b. Cyber Defence Cooperation Implementation (Joint R&T Study) [Joint ESA-EDA Note]
- c. DeSIRE Way Forward: Initial Ideas for a 3rd Phase of Cooperation [Joint ESA-EDA Note TBC]
- d. Earth Observation Cooperation Opportunities Implementation [Joint ESA-EDA Note]
- e. EDA Information on Developing a European Radio-Navigation Policy
- f. ESA Information on Innovative Funding Mechanisms (TIA – Equity Fund TBC)

# Space assets are fundamental for Remote Piloted Aircraft Systems (RPAS) operations

Highly reliable and secure **satellite communication** is required for Beyond Line-of-Sight operations and NRT download of sensor data.

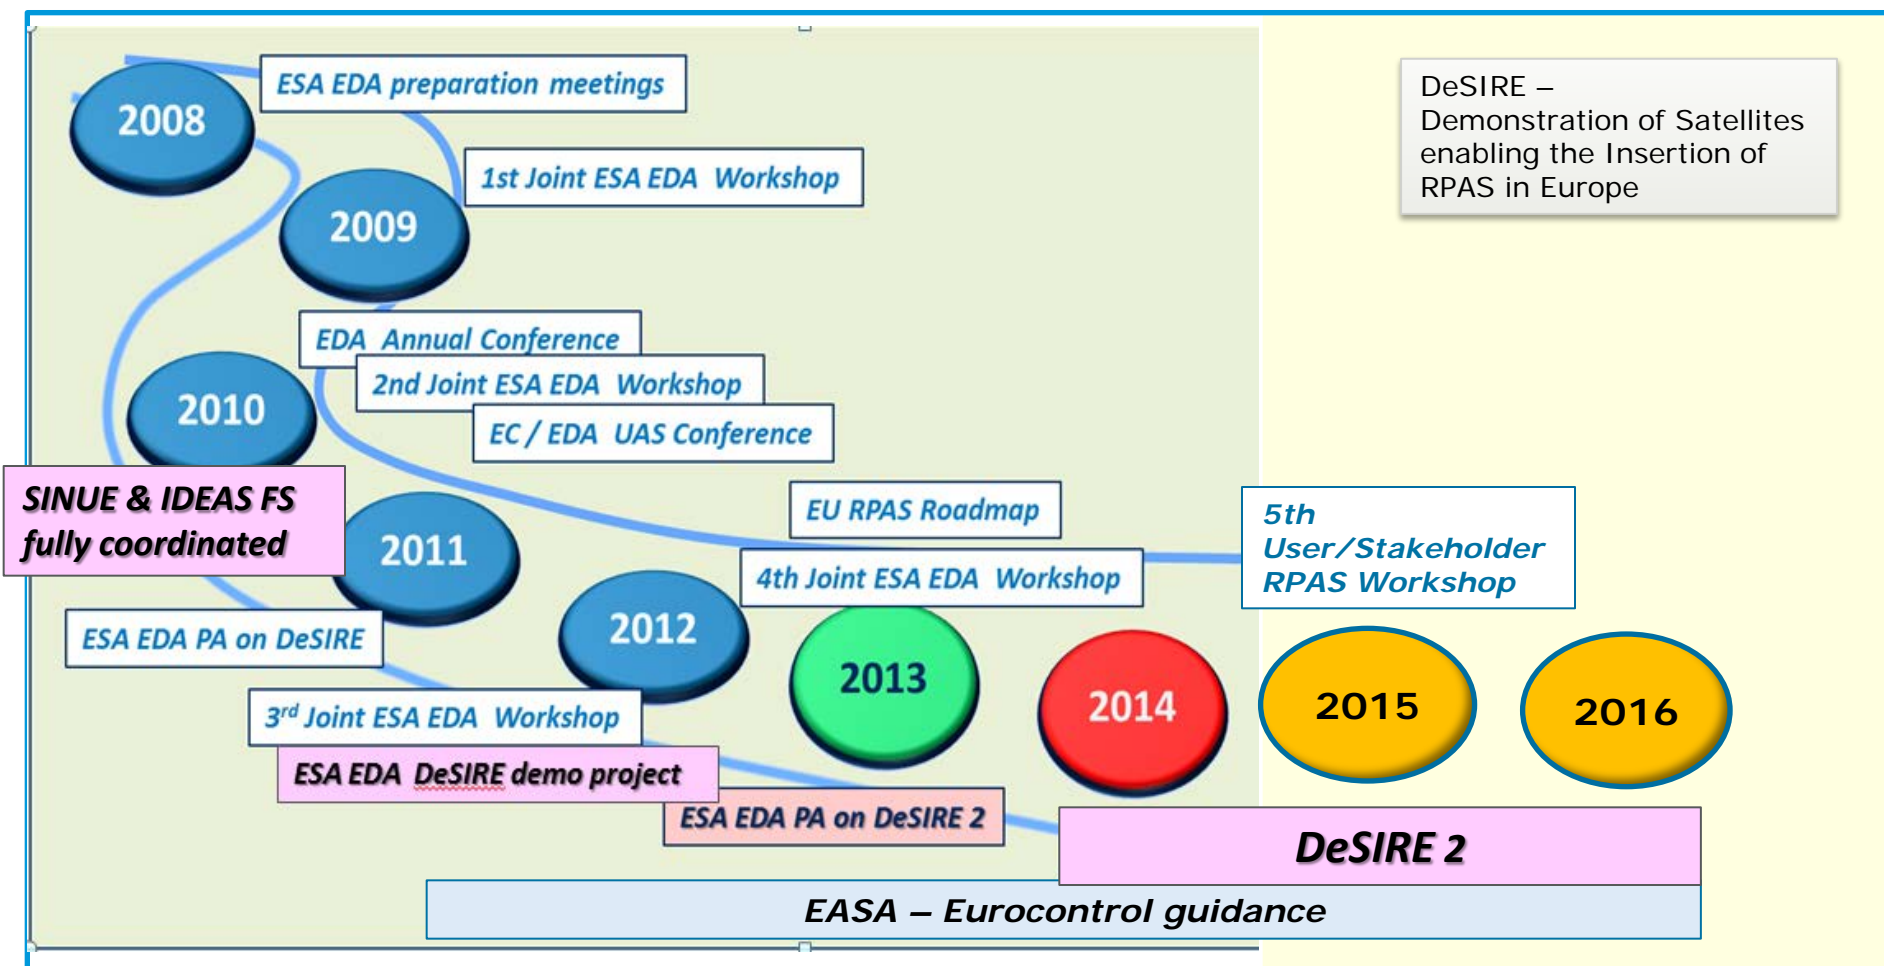

Highly accurate **satellite navigation** is essential for precise navigation and for georeferencing of UAV acquired imagery

Space is a key enabler for RPAS integration in **non-segregated airspace** - pre-requisite for **extensive adoption of RPAS-based applications**

# EDA-ESA collaboration on RPAS

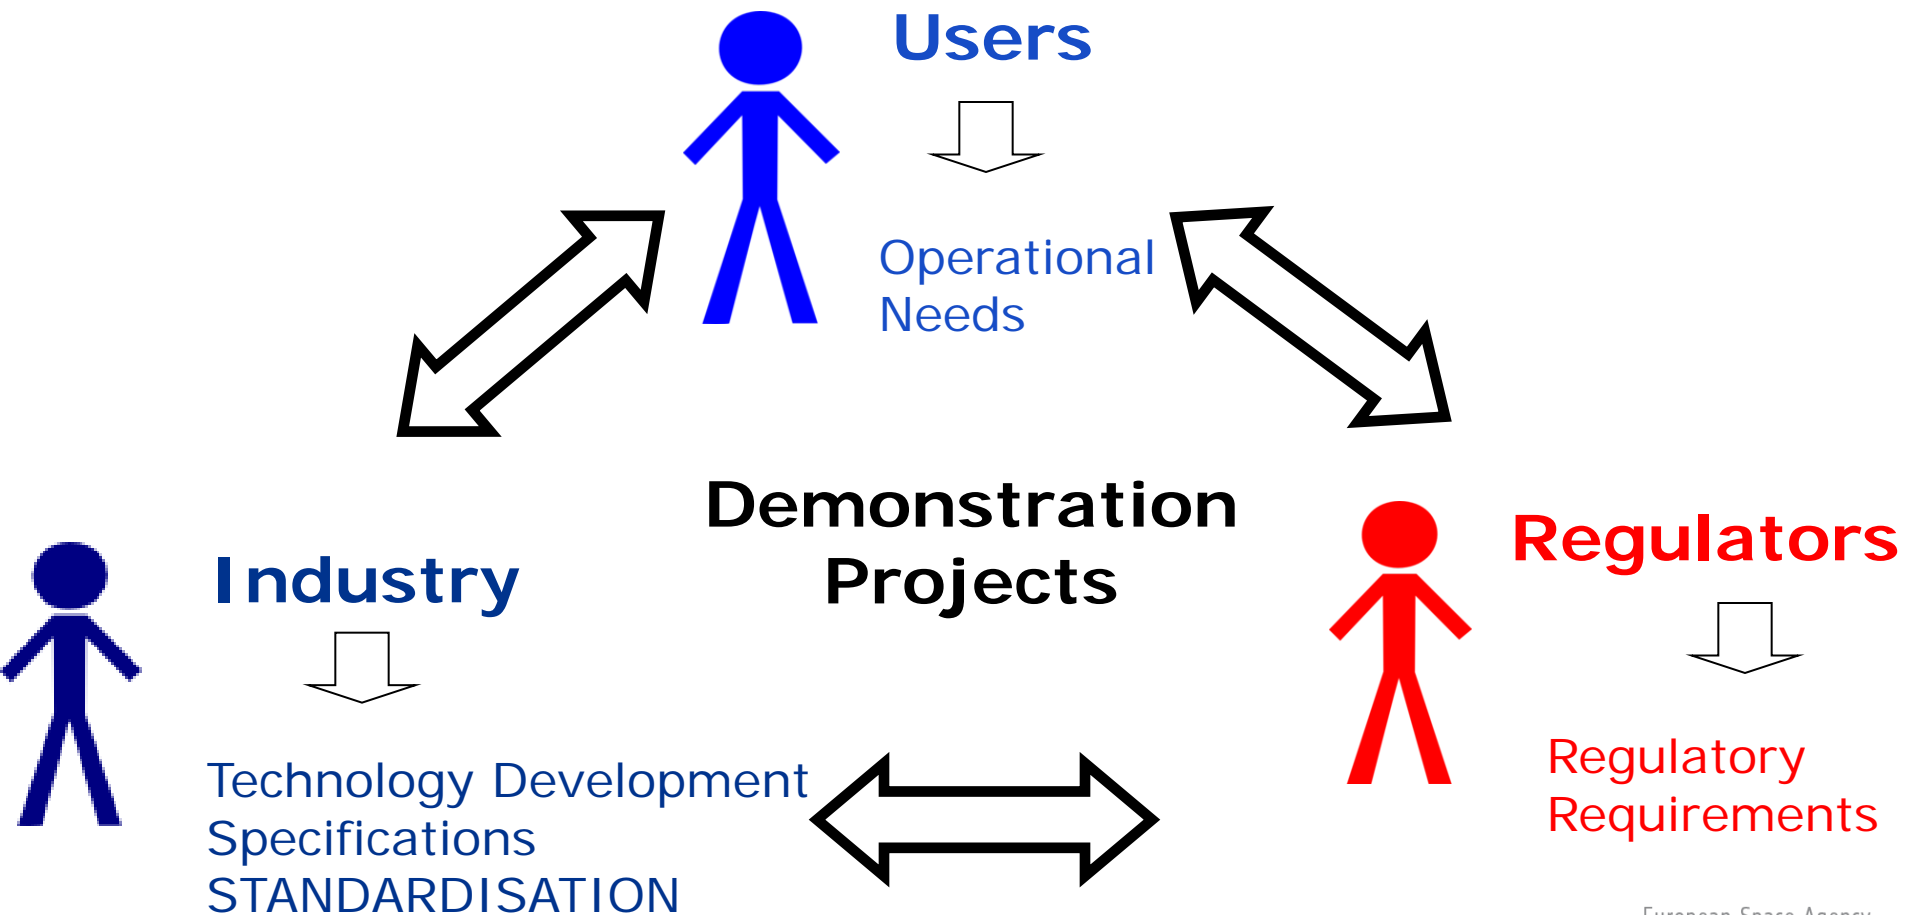

EASA and Eurocontrol have joined this initiative supporting the DeSIRE\* and DeSIRE 2 projects.

European Space Agency

# ESA- EDA joint demonstration roadmap: concept

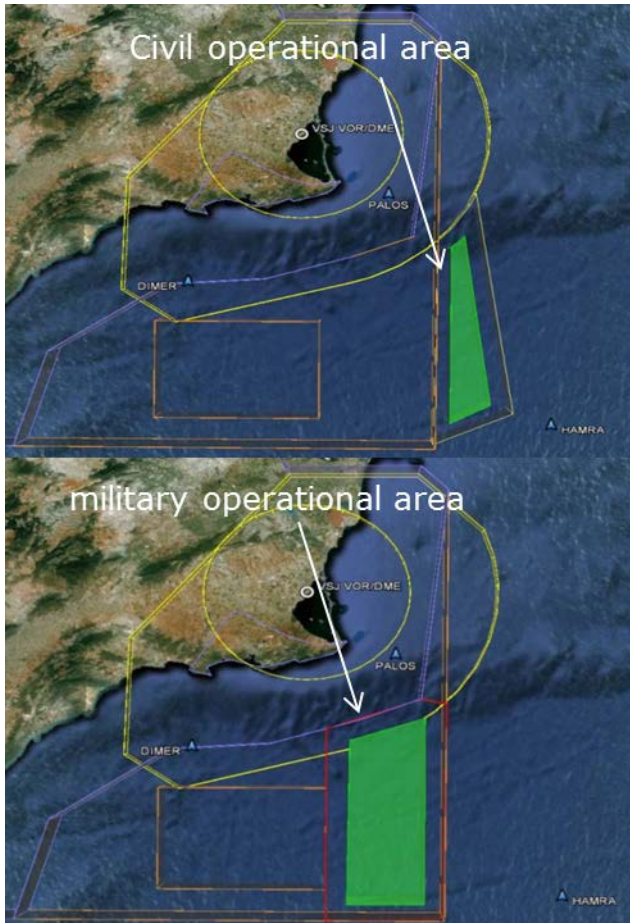

**Provide convincing demonstrations involving all stakeholders**

European Space Agency

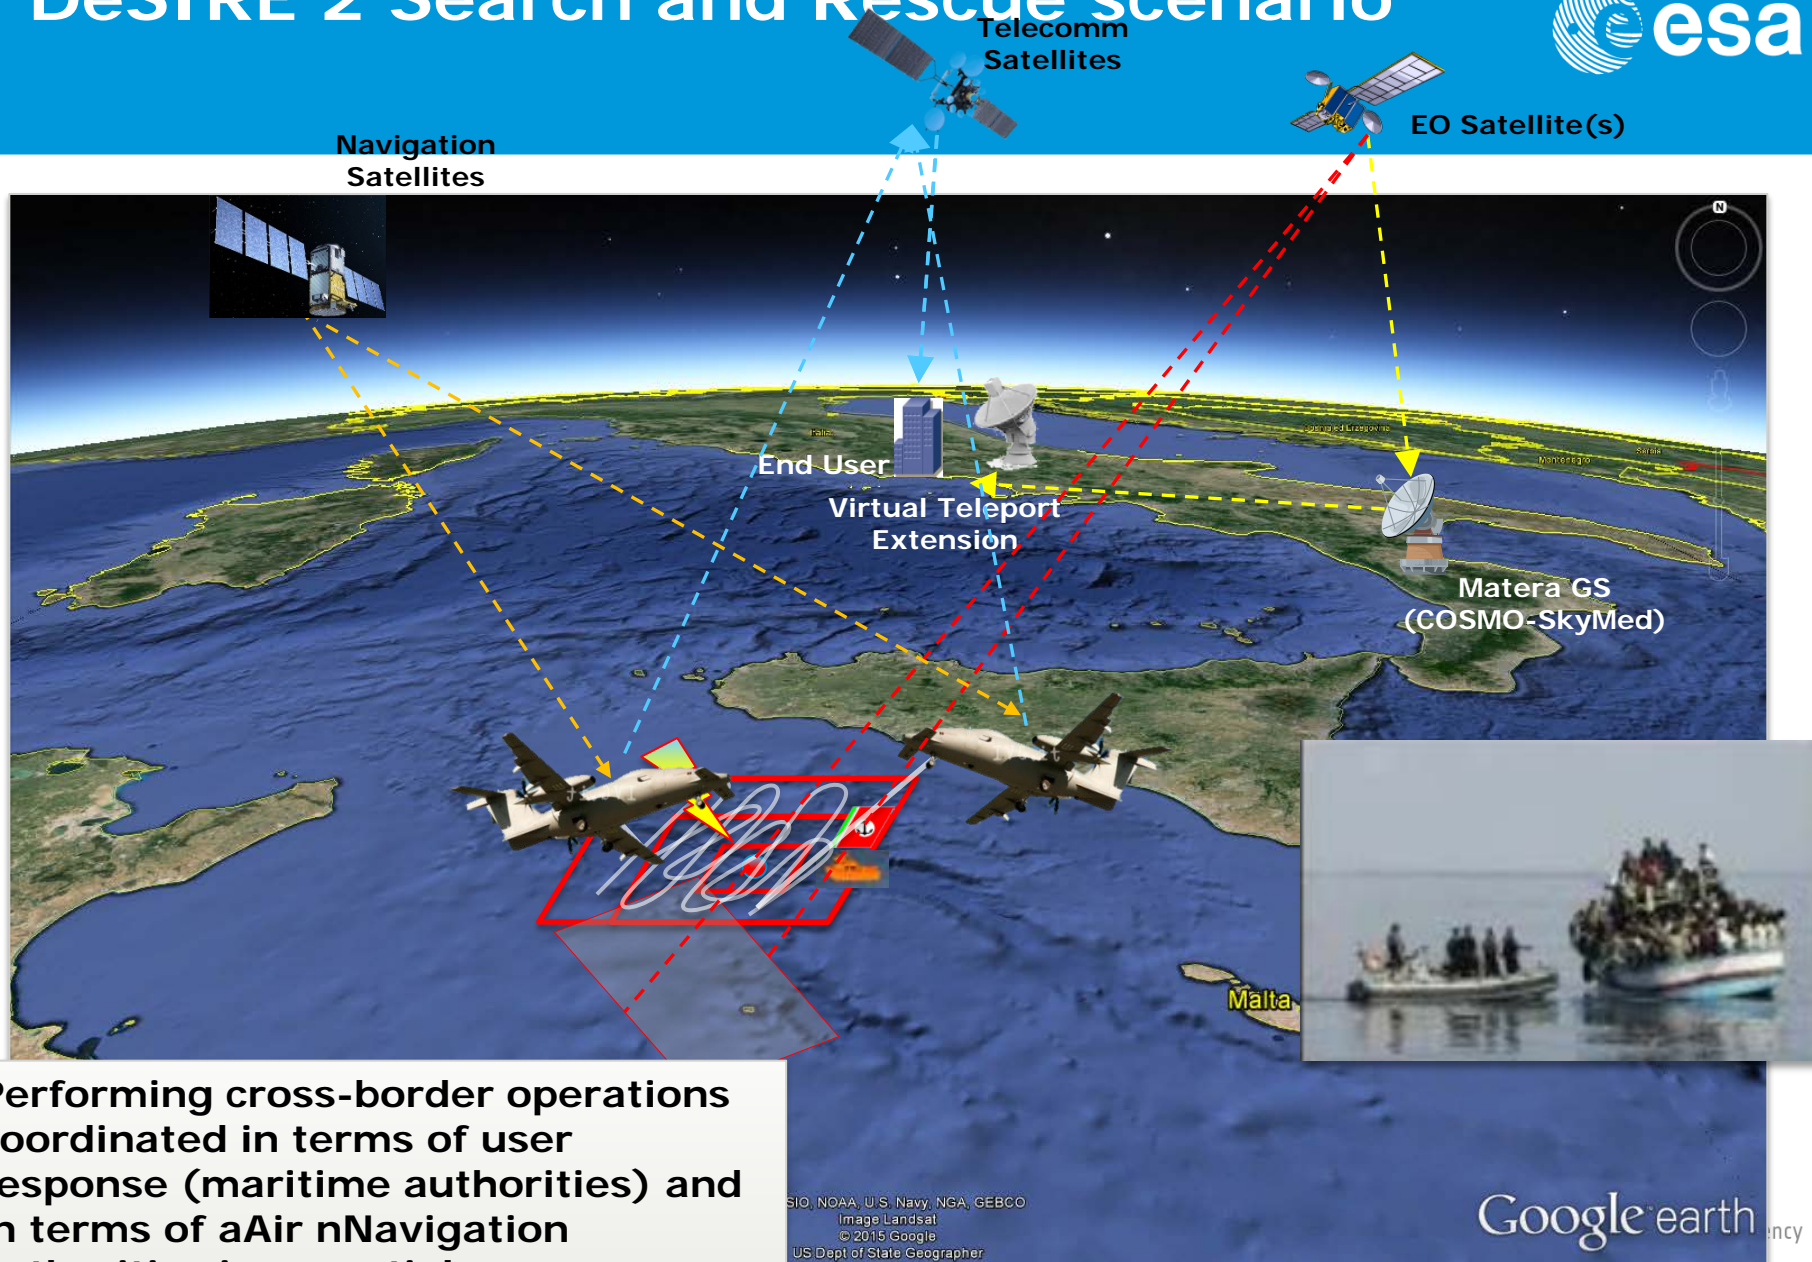

- has demonstrated that RPAS in BRLOS\* conditions relying on SatCom could timely proceed with Traffic Controller instructions/clearances in non-segregated airspace with a realistic separation exercise;
- coordination with civil and military ATC for entering and leaving different control areas (military or civil) was demonstrated;
- has generated evidences that satellite technologies for RPAS safety communications could be acceptable in terms of link quality for integration in non-segregated airspace;
- safety measures and contingency procedures for BRLOS communication loss have been defined, implemented and approved by local authorities;
- sense and avoid solutions for improving pilot situational awareness were tested and demonstrated.

European Space Agency

# DeSIRE 2 Search and Rescue scenario

Performing cross-border operations coordinated in terms of user response (maritime authorities) and in terms of aAir nNavigation authorities is essential.

Increasing needs of RPAS and space assets for services

(e.g. maritime surveillance and Search/Rescue due to the current security situation at the borders of Europe)

## Demonstrate:

air traffic management and collision avoidance capabilities for large-scale RPAS (Beyond Radio Line Of Sight operations + integration in the non-segregated airspace)

at multi-national/EU level the capability to perform RPAS-based operations for crisis management or surveillance purposes (e.g. migration crisis)

operations can be conducted in a secure manner and be resilient to cyber-attacks

## 1. Review of Policy Developments

- a. EDA and ESA Contributions to the EC's Space Strategy for Europe
- b. Coordination of Policy Messages for the 30 May 2016 Informal Space Council
- c. Update on ESA Ministerial Council Preparations

## 2. Opportunities for Cooperation

- a. GOVSATCOM: State of Play
- b. Cyber Defence Cooperation Implementation (Joint R&T Study) [Joint ESA-EDA Note]
- c. DeSIRE Way Forward: Initial Ideas for a 3rd Phase of Cooperation [Joint ESA-EDA Note TBC]
- d. Earth Observation Cooperation Opportunities Implementation [Joint ESA-EDA Note]
- e. EDA Information on Developing a European Radio-Navigation Policy
- f. ESA Information on Innovative Funding Mechanisms (TIA – Equity Fund TBC)

## ESA Information on Innovative Funding Mechanisms

The goal :

Foster new utilization of existing space capacity and capability, in **close partnership with end-users**, through the development of integrated (**different space and non space technologies**) applications projects which demonstrate a potential for **sustainable services**.

**Incubator of Services**

# Integrated Application Promotion (IAP) Scope

## Sustainable services based on

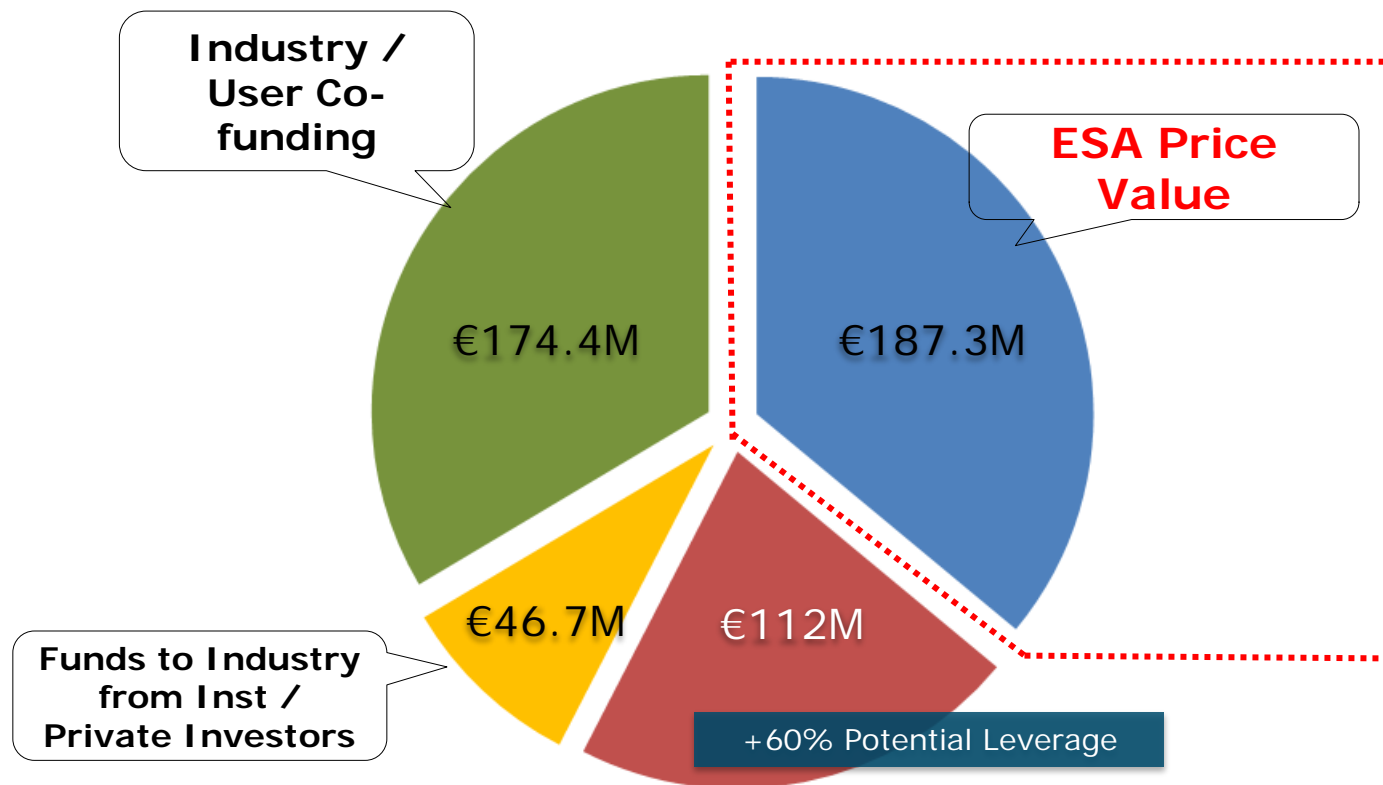

- SATCOM
- SATEO
- SATNAV
- SATAIS
- SATADS-B
- SSW
- HSF
- .....
- .....

in combination with  
terrestrial systems!

## The offer

- Financial support
- Technical & Business expertise
- Promotion
- ESA “branding”
- Networking
- Access to 3<sup>rd</sup> party funding

# IAP Financial Structure

# IAP

## Socio Economic Impact (SEI)

**55** project's impact appraised against 10 Societal -Economic indicators

#	Description	Measure
1	Revenue	Euro
2	Exports	% of revenue going to export
3	Jobs	no. of employees created or sustained linked to the project
4	Investment leverage	Euro, includes total 3 <sup>rd</sup> party investment in terms of equity, debt, grant, public funds or M&A following on from the ARTES project, as compared to the ESA co-funding
5	R&D spend uplift	Increase in the ratio of R&D expenditure/revenue
6	Extent of the value chain	Number of business relationships. This includes consortium partners, suppliers, distributors etc.
7	Addressable market size	Potential financial value without possibility to compare or aggregated
8	Value creation	May be linked to a financial measure without possibility to aggregate figures
9	Societal benefits	E.g. improvement in emergency distress, better education in rural schools, saved lives due to telemedicine
10	Innovation impacts	E.g. market disruption and patents

**1) Cumulated revenue to Date, 2.7 : 1; Cumulated revenue projection 2020, 15.3 : 1**

**2) >70% of revenue goes to export**

**3) 326.5 Jobs created**

# IAP Strategic Partnerships

Maritime Activities

RPAS Activities

eHealth for Sub-Saharan Africa

Space for Rail

"SMAP Fund"

Space for Mediterranean Acceleration Programme

# IAP Strategic Partnerships

- 1) EMSA/ESA SAT-AIS initiative → EC/EMSA are investing 10.2 M€
- 2) 1st RPAS Pilot Service 10 € for EMSA
- 3) The following one, RPAS Pilot Services (with FRONTEX and EFCA) to Monitor Fishery /Migration etc. (~60M€/ 2017)

EUROCONTROL

eHealth for Sub-Saharan Africa

Space for Rail

"SMAP Fund"

or Official Use

Space for Mediterranean Acceleration Programme

# IAP activities related to Remotely Piloted Aircraft Systems - RPAS

## Feasibility

Unmanned Postal Delivery

BIOSCOPE crop mgmt service for potato farmers

STEAM ship emission aerial measurements

UASatcom exploration & pipeline monitoring

PalmOil-Vision carbon footprint in palm oil sector

SAFEDEM enhanced and safe demining

SINUE Integrating RPAS into non-segregated airspace

## Demonstration

B-LiFE biological crisis field laboratory

KORE crop precision farming

DeSIRE Integrating RPAS into non-segregated airspace

RAPSODY UAV based S&R (1) and Pollution Monitoring (2) Services

SAFEDEM enhanced and safe demining

DESIRE 2 Integrating RPAs into non-segregated airspace

## Operational

SURMON (UASatcom) exploration & pipeline monitoring

RPAS range: Micro to MALE RPAS

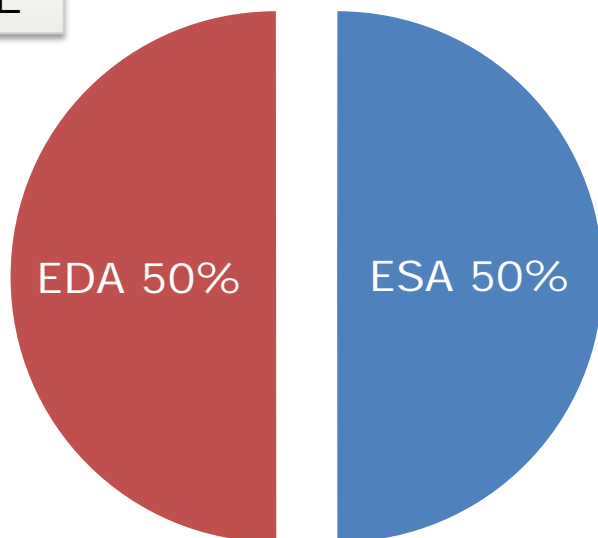

Space assets: Satcom, SatNav integration with sat EO data

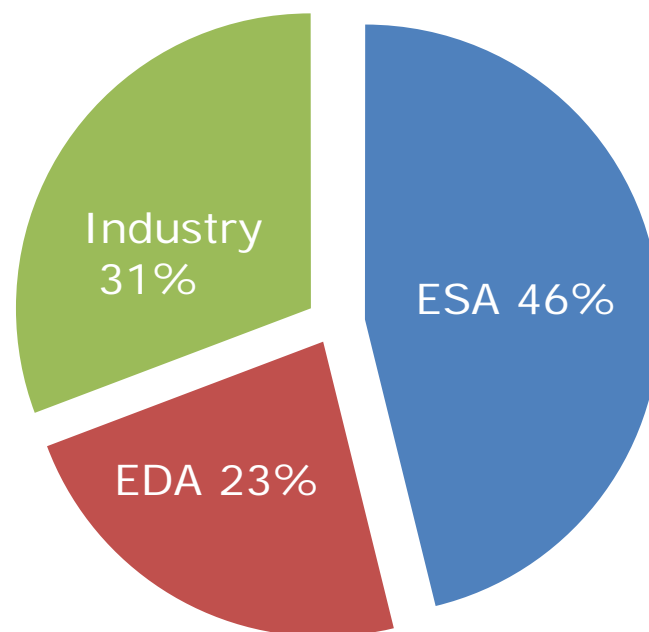

## User / Customer Engagement

# DeSIRE Funding Structure

DeSIRE

DeSIRE 2

# What is next?

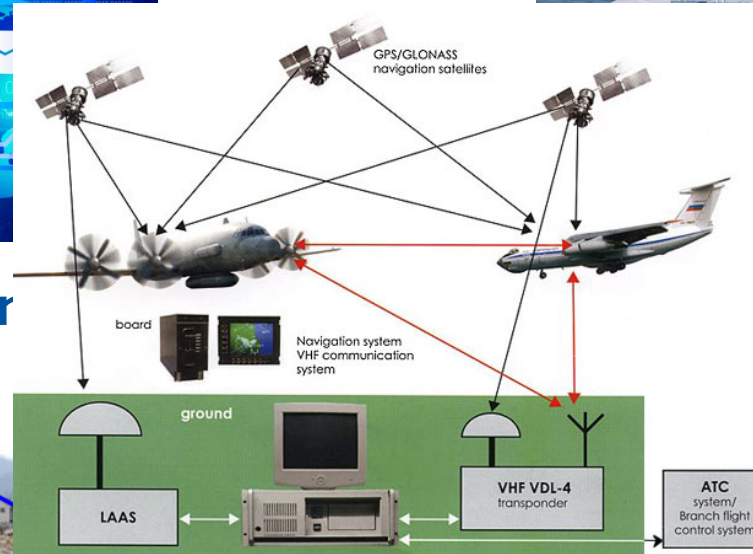

## Cyber-security

## Unmanned Maritime Vehicles

## ADS-B

## CBRN

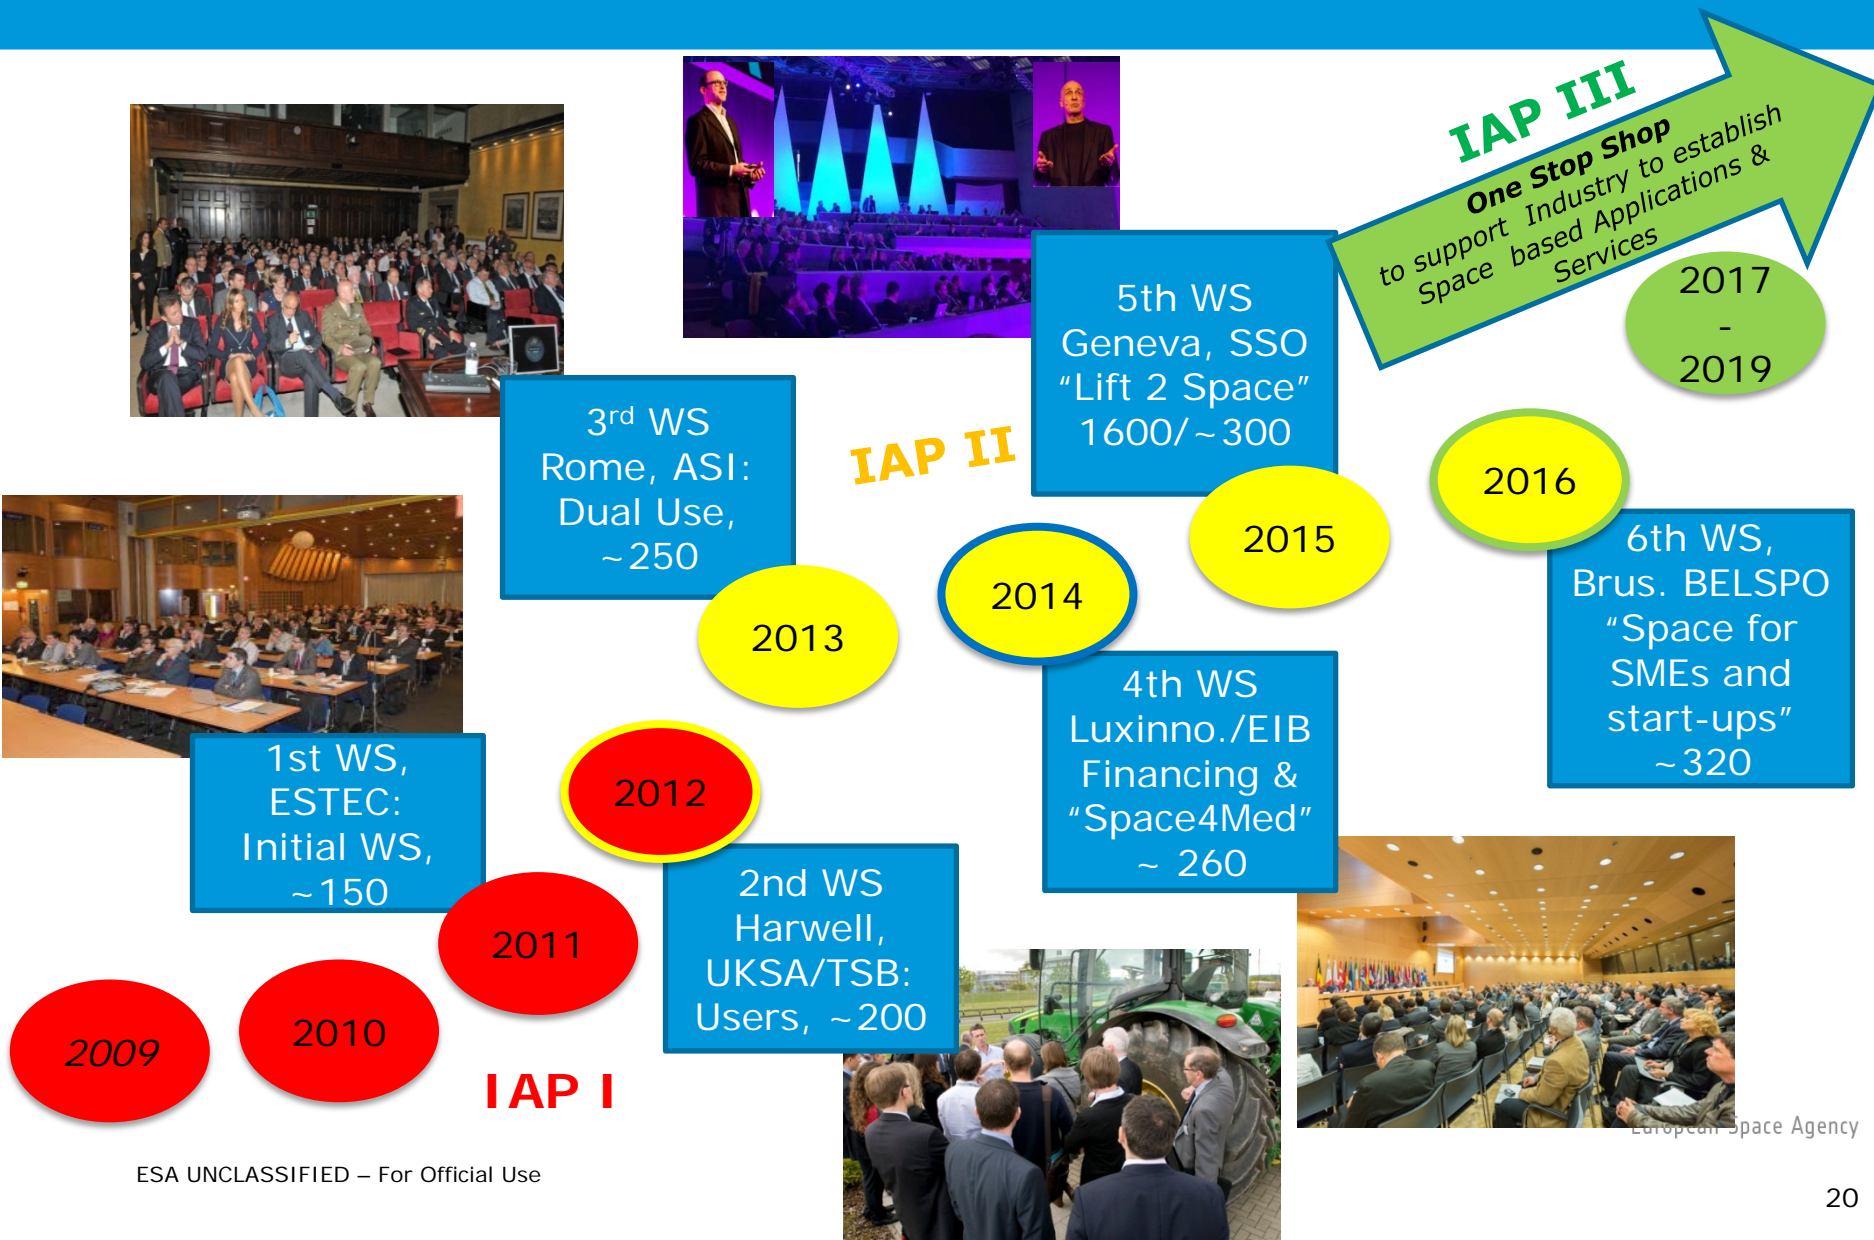

## Emergency response

## Others???

# IAP Evolution

*"Space is the Limit"*

*Thank You!*
