Costa Rica brought space education to students and communities during World Space Week 2025.

Across the country, participants joined talks, workshops, school activities, robotics challenges, and the [NASA International Space Apps Challenge](#) Costa Rica Award Ceremony.

The program explored living in space, space careers, planetary robotics, sustainability, and STEAM learning.

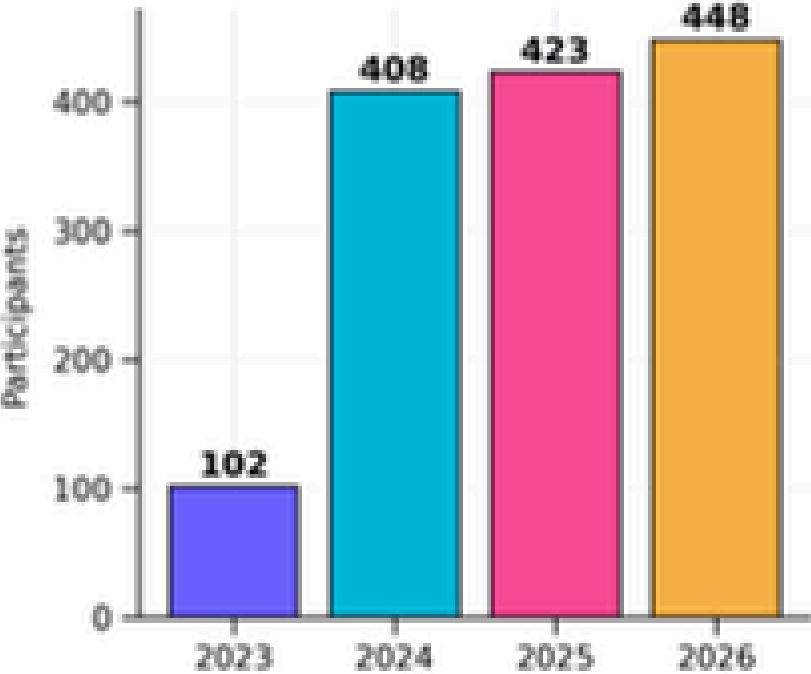

Thank you to Costa Rica's National Coordinator, [Mileyca Oporta](#), educators, schools, partners, and everyone helping grow space education across the country.
